PS-1

I am: A beginner or fitness enthusiast.

I'm trying to: Maintain my workout records and follow a suitable fitness routine.

But: It is difficult to organize my workout history and choose suitable exercises.

Because: I do not have personalized guidance based on my age, fitness goal, experience, and previous workouts.

Which makes me feel: Confused and less motivated to maintain a consistent workout routine.

PS-2

I am: A person who regularly tracks workouts.

I'm trying to: Understand my fitness performance and improve my workouts.

But: I have to manually calculate and analyze workout duration, calories, and progress.

Because: My workout information is not centrally organized and I do not have intelligent fitness analysis.

Which makes me feel: Frustrated and unsure about how to improve my fitness performance.
