Team Leader	ELIZABETH MARY ROBERTS
Team Member	KOWSALYA N
Team Member	NEDHA THASEF H
Team Member	RAFATHUNISSA S

Purpose: Show how FitSense addresses the customer's actual workout-tracking and personalization problems.

1. CUSTOMER SEGMENT(S)	Students, beginners, and fitness enthusiasts who want to track workouts and improve their fitness.
2. JOBS-TO-BE-DONE / PROBLEMS	Maintain workout records, search previous workouts, understand fitness performance, and get suitable workout guidance.
3. TRIGGERS	Starting a fitness routine, setting a new fitness goal, difficulty maintaining workout consistency, or wanting to understand workout progress.
4. EMOTIONS: BEFORE / AFTER	**Before:** Confused, frustrated, and less motivated. **After:** More organized, informed, and motivated through personalized recommendations.
5. AVAILABLE SOLUTIONS	Manual workout notes, spreadsheets, generic fitness apps, online exercise videos, and trainer guidance. These may not combine the user's history with personalized AI recommendations.
6. CUSTOMER CONSTRAINTS	Limited time, difficulty maintaining records, lack of personalized guidance, manual calculations, and difficulty interpreting workout performance.
7. BEHAVIOUR	Users record workouts, search for exercises, track duration/calories, review previous workouts, and try to follow fitness routines.
8. CHANNELS OF BEHAVIOUR	**Online:** fitness apps, websites, social media, and digital workout resources. **Offline:** notebooks, personal trainers, gyms, and informal advice.
9. PROBLEM ROOT CAUSE	Workout information is often scattered or manually maintained, while generic advice does not fully consider individual age, goals, experience, and workout history.
10. YOUR SOLUTION	FitSense provides secure user authentication, centralized workout management, searchable history, and Gemini-powered personalized workout plans, insights, tips, safety recommendations, and improvement suggestions.
